COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

GOVERNMENT PUBLICATIONS RELATING TO TEXTILES

Alvin E. Johnson, Textile Division

INTRODUCTION

BUREAUS ISSUING TEXTILE PUBLICATIONS

Considerable material has been published on textile subjects by the 23 Government bureaus whose activities bear directly on some phase of the industry. These bureaus issue occasional pamphlets listing their publications, but rarely isolate those on textiles.

This pamphlet lists all reported publications issued by Government bureaus dealing with the textile industry or some phase of it. It is a second revision of the pamphlet of the same name and purpose which the textile division of the Bureau of Foreign and Domestic Commerce issued in 1927. Many of the publications listed herein are out of date and no longer readily obtainable, but they contain fundamental information which may be called for. The reader who is unable to locate a publication covering a specific subject is advised to communicate with the appropriate bureau, where the files may contain the information required.

Publications of the following bureaus on textile subjects are included in this pamphlet. Information on the scope of their activity may be found in the Congressional Directory, or may be obtained by communicating with the bureaus direct.

Department of Agriculture:	Department of Commerce—Contd.
Bureau of Agricultural Economics.	Bureau of Foreign and Domestic
Bureau of Animal Industry.	Commerce.
Bureau of Biological Survey.	Patent Office.

Bureau of Public Roads.	cation.
Weather Bureau.	Federal Reserve Board.
Department of Commerce:	Federal Trade Commission.
Bureau of the Census.	United States Tariff Commission.
Bureau of Fisheries.	

HOW TO OBTAIN PUBLIC DOCUMENTS

If a price is quoted in the descriptive paragraph, the publication may be obtained from the Superintendent of Documents, United States Government Printing Office, Washington, D. C. Application must be accompanied by remittance of proper amount. Publications of the Bureau of Foreign and Domestic Commerce may also be purchased or consulted at the district and cooperative offices of the bureau listed on page 6.

If no price is quoted the publication is free, and application should be made directly to the issuing bureau.

Copies of bulletins designated as "Exhausted" may be consulted at the depository libraries, listed hereinafter, or borrowed from the issuing bureau. If there is no depository library in your locality, your public library can usually borrow the desired publication from the nearest depository branch.

Although in many cases Government bulletins are sent free by the issuing department, the supplies allotted for such distribution are usually limited. Nearly all of these public documents are sold by the Superintendent of Documents. The prices charged cover only cost of paper and printing, no charge being made for the services of the scientific and technical men who are the authors of the various books, pamphlets, periodicals, etc., nor are commissions allowed for their sale. The Superintendent of Documents is not authorized to supply free copies of anything except price lists.

The quickest and most convenient method of obtaining the publications listed in this catalogue is to order from the Superintendent of Documents, remitting the payment in advance by coupons, postal money orders, express order, or New York draft. Currency is sent at the sender's risk; postage stamps, coins defaced or worn smooth, foreign money, and uncertified checks will not be accepted. For the convenience of the general public, coupons that are good until used in exchange for Government publications are sold by the Superintendent of Documents in sets of 20 for \$1.

LIST OF DEPOSITORY LIBRARIES

Bureau of Agricultural Economics, Department of Agriculture. Statistical data on cotton gins, with costs of ginning. 1927. 30 p.

Cottonseed Mixing Increased by Modern Gin Equipment.

Bureau of Agricultural Economics, Department of Agriculture. Department Circular No. 205. Discusses how seed is mixed in the roll box, extent of mixture with modern gin equipment, and the need of cooperation in order to maintain superior varieties. 1922. 22 p. 5 cents.

Lint Percentage and Lint Index of Cotton and Methods of Determination.

Bureau of Plant Industry, Department of Agriculture. Department Bulletin No. 644. 1918. 12 p. Exhausted.

Delinting and Recleaning Cottonseed for Planting Purposes.

Bureau of Agricultural Economics, Department of Agriculture. Department Bulletin No. 1219. 1924. 20 p. 10 cents.

System of Accounting for Cotton Gineries.

Bureau of Agricultural Economics, Department of Agriculture. Department Bulletin No. 985. 1921. 42 p. 10 cents.

Cotton-Gin Fires Frequent, Chief Cause is Static Electricity.

Bureau of Chemistry and Soils, Department of Agriculture. Yearbook Separate No. 1114. Gives suggestions for fire protection. 1930. 3 p. 5 cents.

Fires in Cotton Gins and How to Prevent Them.

Bureau of Chemistry and Soils, Department of Agriculture. Circular No. 76. Dwells on the causes of cotton-gin fires with a description of tests made of the so-called match theory, but states that other causes are also responsible for fires, the principal among these being static electricity. 1920. 8 p. 5 cents.

VARIETIES**Cotton of Long Staple Could Be Produced in Much Greater Quantity.**

Bureau of Plant Industry, Department of Agriculture. Yearbook Separate No. 1134. Covers sea-island and Egyptian long staples, community production, and poor fiber as a cause of loss. 1930. 6 p. 5 cents.

Factors Affecting the Production of Long-Staple Cotton.

Bureau of Plant Industry, Department of Agriculture. Plant Industry Circular No. 123-A. Discusses production, marketing, special requirements, etc. of long-staple cotton. 1913. 6 p. Exhausted.

Sea-Island Cotton.

Bureau of Plant Industry, Department of Agriculture. Farmers' Bulletin No. 787. Deals with the geographical distribution of sea-island cotton in the United States, possible extension of the sea-island cotton-producing area, markets, factors governing prices, cultivation, and diseases of sea-island cotton. 1916. 40 p. Exhausted.

Sea-Island and Meade Cotton in the Southeastern States.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 414. Discusses interest in sea-island cotton, growing conditions, susceptibility to the boll weevil, and experiments conducted with sea-island and Meade cotton. 1927. 20 p. 5 cents.

Meade Cotton, an Upland Long-Staple Variety, Replacing Sea-Island.

Bureau of Agricultural Economics, Department of Agriculture. Department Bulletin No. 1030. Discusses the need of replacing sea-island cotton, value of Meade cotton as a substitute for sea-island, origin of the Meade variety, cultivation, and spinning tests. 1922. 24 p. Exhausted.

Acala Cotton, a Superior Upland Variety from Southern Mexico.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 2. Deals with the origin, production, diversity, etc., of the Acala variety. 1927. 30 p. 20 cents.

Study of Off-Type Plants of Acala Cotton.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 390. 1926. 11 p. 10 cents.

Production of Acala Cotton in the San Joaquin Valley of California.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 357. Covers cultural conditions, preparation of lands, cultivation, irrigation, and classing and marketing. 1925. 23 p. 10 cents.

Production of American Egyptian Cotton.

Bureau of Plant Industry, Department of Agriculture. Department Bulletin No. 742. Discusses early attempts to establish Egyptian-cotton growing in the United States and gives suggestions for cultivation. 1919. 30 p. Exhausted.

Cotton of American-Egyptian Variety in the United States.

Bureau of Plant Industry, Department of Agriculture. Yearbook Separate No. 968. 1927. 4 p. 5 cents.

Culture of Pima and Upland Cotton in Arizona.

Bureau of Plant Industry, Department of Agriculture. Farmers' Bulletin No. 1432. Discusses the selection of a variety, preparation of the land, time and method of planting, cultivation, irrigation, and picking. 1924. 14 p. 5 cents.

Comparison of Pima Cotton with Upland Varieties in Arizona.

Bureau of Plant Industry, Department of Agriculture. In Journal of Agricultural Research, Vol. 28, No. 9. Describes varieties studied and methods employed, differences in plant growth and flower production, etc. 1924. Exhausted.

Variations in Seed Fuzziness on Individual Plants of Pima Cotton.

Bureau of Plant Industry, Department of Agriculture. In Journal of Agricultural Research, Vol. 37, No. 8. 1928. 20 cents.

Self-Fertilization and Cross-Fertilization in Pima Cotton.

Bureau of Plant Industry, Department of Agriculture. Department Bulletin No. 1134. Contains sections on such subjects as vicinism or natural hybridization in cotton, ontogeny of flower in relation to pollination, pollen-carrying insects, boll shedding in relation to pollination and fertilization, etc. 1923. 68 p. 10 cents.

Development of Flowers and Bolls of Pima and Acala Cotton in Relation to Branching.

Bureau of Plant Industry, Department of Agriculture. Department Bulletin No. 1365. 1927. 28 p. 5 cents.

The Uniformity of Pima Cotton.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 247. Discusses origin and development of the Pima variety, uniformity affected by soil variation, seed supply in Salt River Valley, etc. 1922. 6 p. Exhausted.

Water-Stress Behavior of Pima Cotton in Arizona.

Bureau of Plant Industry, Department of Agriculture. Department Bulletin No. 1018. 1922. 24 p. 10 cents.

RESEARCH AND EXPERIMENTS**Cotton Breeding To-day Works with Main Types Known in Remote Past.**

Bureau of Plant Industry, Department of Agriculture. Yearbook Separate No. 1137. Deals with the Asiatic and American cottons and points out the difficulty of attempting to cross or hybridize them. 1930. 9 p. 5 cents.

Inheritance of Smooth Seeds in Cotton.

Bureau of Plant Industry, Department of Agriculture. In Journal of Agricultural Research, Vol. 35, No. 3. 1927. Exhausted.

Inheritance of Rate of Shedding in a Cotton Hybrid.

Bureau of Plant Industry, Department of Agriculture. In Journal of Agricultural Research, Vol. 34, No. 10. 1927. Exhausted.

Breeding New Types of Egyptian Cotton.

Bureau of Plant Industry, Department of Agriculture. Plant Industry Bulletin No. 200. 1910. 39 p. Exhausted.

Improvement in Cotton Production.

Bureau of Plant Industry, Department of Agriculture. Department Circular No. 200. Discusses improvement of cotton varieties, characters that facilitate picking, value of short-season varieties, adaptation to special conditions, improvement of seed supplies, etc. 1921. 12 p. 5 cents.

Applicability of Pearson's Equivalent-Probability Method to the Problem of Seedling Mortality in Cotton.
